

Quality Specifications and Inspection Guidelines for Fire Rated Filmed Glazing

Applied Film on flat glass surfaces is not expected to have the same level of visual quality as standard float glass.

Inspect glass from a distance of 10' at a 90 degree angle

Pinholes

Acceptable: Pinholes no larger than 1/8"

Non-Acceptable: More than two readily apparent blemishes in a 3" diameter circle or more than five in a 12" diameter circle

Scratches

Acceptable: Scratches up to 2" in center of glass or up to 3" in outer area

Non-Acceptable: Concentrated scratches or abraded areas are not allowed
