

Five touching reasons you need FingerGuard.

No more **pinched pinkies** in the doorjamb
of child care centers and nursing homes.

No more **mushed** and **mashed**
in schools and churches, restaurants
and public buildings.

No more with FingerGuard.

1. Because it works without impeding the opening or closing of the door, actually expanding the jamb to keep fingers from being crushed.
2. Because it fits all kinds of doors, single or double acting, hung any which way, made from just about anything.
3. Because it looks good while it does it, even the hinge-side protector comes in matching colors.
4. Because it comes in a choice of finishes and lengths.
5. Because

it comes UL Classified
for 60 minutes (UL10B).

Because big and little
fingers alike get painfully
caught in places they

don't belong, you need the flexible, dependable
protection of FingerGuard from NGP.

Call the guard. 1-800-NGP-RUSH.
